DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 and 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haremza et al. US 6,214,929.

3. The rejection set forth under 35 USC 103 in the paper mailed 7/2/07 is deemed proper and is herein repeated.

4. The newly amended claims and the remarks filed in support thereof have been fully considered but have been found not persuasive.

5. The claims have been amended to recite that the stabilizer is present in an amount greater than "100 parts of stabilizer per 100 parts of carrier." This limitation is argued as distinguishing from the art which is alleged to teach the addition of 9.09% to 50% of stabilizer to polymer. This is not persuasive.

6. The art is no way limited to a maximum amount of 50% stabilizer relative to polymer. This is the normal and preferred amount. There is no teaching of any disadvantage realized when using a greater amount of stabilizer relative to polymer. As such, using greater amounts of stabilizer is prima facie obvious.

7. This limitation is further met when mixtures of polymers are used consistent with the disclosure at column 12 lines 31. As drafted, the claims require the stabilizer to be present in an amount greater than the amount of the "carrier polymer." This is a single

polymer. When the art describes mixtures of polymers, the amount of a single polymer in the mixture, reading on the "carrier polymer," meets the polymer limitation. When the stabilizer is used in an amount greater than the amount of the single polymer in the mixture then this limitation is anticipated. This is to say that polymers A and B are mixed in an 80 parts A -20 parts B system. The stabilizer is used in an amount of 25 parts. The amount of stabilizer relative to polymer B anticipates the claim limitation. Once again, mixtures of polymers are disclosed in the art at column12 lines 31+.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
